— LeetCode

Education

Manipal University Jaipur

Aug 2023 – Jul 2027

B.Tech in Computer Science and Engineering

CGPA: 9.1/10

Experience

Tech Mahindra

June 2025 – Aug 2025

Software Developer Intern

Pune, India

- Architected and delivered a **full-stack marketplace web application** for remanufactured engines, reducing manual order processing time by **40%** through automated workflows.
- Built **RESTful APIs** using **Node.js** and **Express** with **MongoDB**, handling **10+ data models** and supporting concurrent multi-user inventory and transaction management.
- Engineered a responsive frontend interface that improved cross-device usability, contributing to sprint deliverables **on time across 3 agile cycles**.

Deloitte

Oct 2025 – Jan 2026

Industry Capstone Project

Remote

- Developed an **AI-enabled mobile app** supporting Alzheimer's and dementia patients with Deloitte mentors.
- Collaborated in a team environment using professional development practices and version control with **GitHub**.
- Contributed to core app features, AI integration, and regular project reviews.
- Demonstrated strong teamwork, technical competence, and industry-standard professionalism.

Projects

CogniAnchor – AI App for Alzheimer's Patients

[GitHub]

Flutter, LangChain, FastAPI, Python — Deloitte Industry Capstone

- Built an **AI-powered mobile app** using **Flutter** to support Alzheimer's and dementia patients.
- Implemented **voice-based reminder placement** and **face detection** using an offline database.
- Developed robust backend with **FastAPI**; collaborated with Deloitte mentors in an agile team environment.

ARCANE – Agentic Replication of Cyberfraud and Adversarial Narrative Environments

[GitHub]

Python, Mesa, Phaser.js, YAML, LLMs

- Built a **multi-agent simulation framework** using **Mesa** to study social engineering and cyber fraud behavior in sandboxed environments.
- Designed **deviant agents** executing 5-phase social engineering attacks (urgency, authority, fear) and **benign agents** driven by Big Five personality traits via YAML personas.
- Integrated **LLM-powered** agent reasoning (Gemini) with multi-channel communication (SMS, Email, Social DM) and a **Phaser.js** pixel-art dashboard for real-time monitoring.

Chess Engine

C++, C, CMake

- Built a chess engine in **C++** with **CMake** build system, using **bitboard representation** (64-bit integers per piece type) for efficient move generation and board state management.
- Implemented **Alpha-Beta pruning** with **quiescence search** to mitigate the horizon effect, and a custom **evaluation function** using **piece-square tables (PST)** for positional scoring.

Skills

Languages: Python, C++, Java, JavaScript

Technologies/Frameworks: AWS, FastAPI, React, Node.js, Express, MongoDB

Data and ML: Hugging face, pytorch, LangChain, scikit-learn, matplotlib

Tools: Git, GitHub, Docker, Jupyter Notebook

Achievements

- Solved over **150 DSA** Questions on Leetcode
- Placed **Top 10** in the Innovation Ideathon presented by Deloitte.
- 3x Dean's List** – Consistently recognized for outstanding academic performance.
- Achieved academic excellence in school, securing **93.8%** in Class X (ICSE) and **86.8%** in Class XII.
- Earned an **international FIDE chess rating 1422 (classical)**, demonstrating advanced problem-solving skills.

Certifications

- GFG Java OOP Certificate**
